

SCIENTIST IN RESIDENCE PROGRAM

helping children and teachers discover
the world through hands-on science

Scientist in Residence Program Receives Award of Recognition from the British Columbia School Superintendents Association

Dr. Paige Axelrod, Founder and Managing Director, is deeply honoured to have received an Award of Recognition for the Scientist in Residence Program from the British Columbia School Superintendents Association (BCSSA). The award is for the program's contributions to support and enhance public school education in the Province of British Columbia. The nomination was made by Mr. Steve Cardwell, Superintendent of Schools/CEO, Vancouver School District.

Steve Cardwell presents an Award of Recognition to Paige Axelrod for the Scientist in Residence Program at the BCSSA Recognition and Awards Dinner on April 11, 2013 at the Sutton Place Hotel, Vancouver, BC.

This award acknowledges the dedication and fabulous work of 22 scientists, 129 teachers, and more than 3100 children in 40 elementary schools in Vancouver and one school in West Vancouver since the program's inception in 2004. These students have been inspired by having a scientist come to their class week after week. They have discovered their world through hands-on science.

This award also acknowledges our Partners in Science, including the Vancouver Board of Education. Their very generous support has enabled the program to enrich science education, spark curiosity and excitement, and get children hooked on science. The Scientist in Residence Program is deeply grateful for this support.
