

# The Chemistry of the Epsom Salt Painting

To make epsom salt solution, molecules of water and epsom salt are mixed. On the painting, water and epsom salt molecules separate again, and crystals form.

Add these words to the cycle of molecules mixing and separating:

**water**

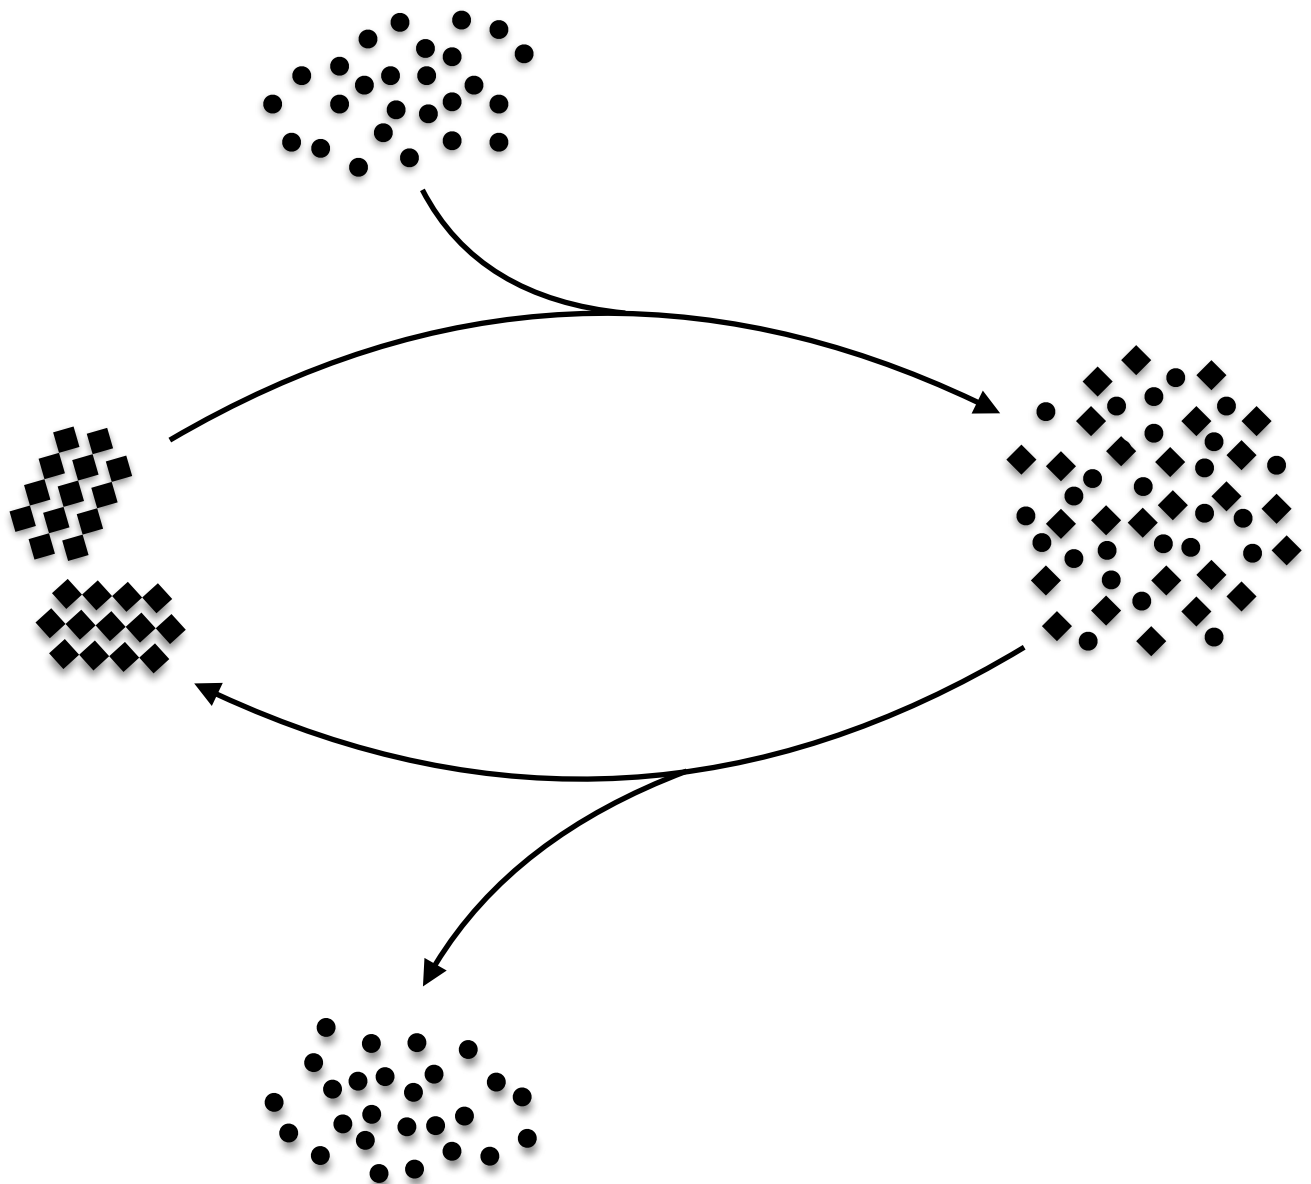

**crystallization**

**dissolving**

**epsom salt  
crystals**

**epsom salt  
solution**

**evaporation**

● = water molecule

◆ = epsom salt molecule
